## Full Stack Developer

I am passionate about leveraging JavaScript, Node.js, React.js, Express.js, TypeScript, Next.js, and PostgreSQL to craft seamless and innovative web solutions. Aspiring entrepreneur with a vision to lead and contribute to groundbreaking projects. My distinctive ability lies in dissecting complex problems and transforming them into elegant, code-driven solutions. Let's connect and explore the intersection of technology and entrepreneurship. I am seeking for a Frontend, Backend or a full-stack developer role.

### TECHNICAL SKILLS

Languages: Nodejs, MongoDB, PostgreSQL, JavaScript, TypeScript, CSS, HTML, Material UI bootstrap

Version Control: Git, GitHub,

Tools: VS Code

Frameworks/Libraries: Express js, Reactjs, Nextjs, Tailwind CSS,

### TECHNICAL PROJECTS

**Commercefy Frontend:** Live project <https://commercefyhere.netlify.app/>

- A small business payment platform that simplifies business owners transactions.
- Business owners can manage their clients.
- Business owners can track their transactions.
- Real time notification.
- Real time dashboard update.
- Business owners can create invoices for the client.
- Clients can make payment with their
- 

**Hospital Recommender System Frontend** - GitHub <https://github.com/chile4coding/hrs.git>

-live project: <https://hrs-chile4coding.vercel.app/>

- A next.js Application for frontend

**Hospital Recommender System REST API** - GitHub [https://github.com/chile4coding/system\\_recommender](https://github.com/chile4coding/system_recommender)

- A node.js API for backend

**Hospital Recommender System Frontend** - GitHub [https://github.com/chile4coding/stewart\\_frontend.git](https://github.com/chile4coding/stewart_frontend.git)

-live project: <https://stewart-frontend-chile4coding.vercel.app/>

- A next.js Application for frontend

**Stewart Collections REST API** - Live project <https://stewart-frontend-chile4coding.vercel.app/>

**Stewart Collections REST API** - GitHub [https://github.com/chile4coding/stewart\\_backend.git](https://github.com/chile4coding/stewart_backend.git)

- A node.js API for backend

**Therapy App Frontend** Vercel: <https://therapy-app.vercel.app>

- Used reactjs library to implement the frontend for the app
- Collaborated with other developers in wireframing of the app
- Collaborated with other developers in implementing various user interface such as:
- Therapist signup, login, dashboard
- Used daisyUI for responsive design

**TherapyApp REST API** - GitHub <https://github.com/chile4coding/apitherapy>

- A Nodejs REST API for Therapy app
- Integrated therapist and patient sign up and login routes
- Implemented OTP verification, used nodemailer for mailing
- Implemented realtime updates of both patient and therapist users
- Used mongodb for managing users data

**BankistApp** - GitHub <https://github.com/chile4coding/BankistApp> | Netlify: <https://modern-bank.netlify.app>

A JavaScript web app with most of the functionality of our mobile bank apps

- Integrated login, and sign-up, timer, withdraws, transfer and loan features
- Login username: co Login pin: 1111
- Deployed with Netlify for frontend
- Manipulated and traversed the DOM using event handlers

**Bank-E-commerce-website** - | Live Site: <https://bank-ecommerce-website.netlify.app>

A JavaScript Bank E-commerce website

- Used CSS for styling
- Implemented image lazy loading for smaller mobile devices
- Implemented smooth scrolling and image slider

**Display menu- GitHub** <https://github.com/chile4coding/menu-display> | Live Site: <https://menudisplay.netlify.app/>

A JavaScript menu display application

- Used a local API to generate data
- Displayed the data using array map method
- Filter menu display based on the selected category
- Used CSS for styling

**Quote store** - | Live Site: <https://react-chile-prep.web.app/quotes>

A React JS quote store application.

- Used firebase to store user quotes
- Used redux to manage the app wide state
- Use react router for page navigation
- Used CSS for styling

**React E-commerce store** - | Live Site: <https://chile-react-ecommerce-store.netlify.app/>

GitHub: <https://github.com/chile4coding/react-ecommercerec-store>

A React JS E-commerce store application

- Used react hooks to manage state and optimized performance
- Used react router for routing
- Used css for page styling
- Used firebase to manage user entries

## PROFESSIONAL/WORK EXPERIENCE

---

### Asted Group (Frontend Web Developer)

At Asted Group, I served as a frontend web developer, where I actively participated in the development of user-centric web applications. Leveraging HTML, CSS, and JavaScript, I played a key role in crafting visually appealing and functional interfaces. My responsibilities included collaborating with the team to implement designs and ensuring cross-browser compatibility, resulting in high-quality web solutions. This experience further solidified my expertise in frontend development, refining my abilities to create intuitive and efficient user interfaces.

### ABS Technology

#### Entry level | Project Coordinator and Backend Engineer

PortHarcourt , Nigeria

2023-03-01 | 2023-08-01

ABS Technology (Project Coordinator & Backend Developer)

At ABS Technology, I had a dual role as a project coordinator and backend developer. As a project coordinator, I managed and coordinated various project activities, ensuring efficient communication between team members and stakeholders, scheduling tasks, and overseeing project timelines. Simultaneously, as a backend developer, I focused on leveraging Node.js, Express, and TypeScript to create robust server-side functionalities. I actively participated in the design and implementation of scalable and efficient back-end solutions, ensuring the seamless integration of different components to meet project requirements. This role provided me with a comprehensive understanding of project management alongside hands-on experience in backend development, enhancing my skills in both technical and organizational aspects of software development.

### Code Acorn

#### Mid level | Reactjs Contractor

New York City , United States

2022-12-01 | 2023-03-01

(React.js Contractor)

As a React.js contractor at Code Acorn, I provided specialized expertise in React.js development. I was involved in contributing to specific projects, where I utilized React.js to create efficient, high-quality solutions. Working as a contractor allowed me to focus on leveraging React.js's capabilities to deliver tailored and optimized applications, emphasizing my proficiency in building interactive and dynamic user interfaces using this technology.

### Boot camp

Software Engineering Student

Code2Teach  
Sept 2021 - April 2022

- Applied computer science data structures and algorithms to solve computational problems ensuring the data flow within a finite amount of space and time
- Gained hands-on experience with JavaScript, CSS, HTML, React, React Hooks, APIs and tech principles whilst working on team/individual projects, code reviews, and pair programming session
- Collaborated with a team of web developers in building a therapy app.

### Whitehat Innovation

Student Intern

## EDUCATION

---

Ignatius Ajuru University

Bachelor of Science in Computer Science

PortHarcourt, Rivers State.  
Nov., 2023.
