SUMMARY

I am a frontend developer with a strong foundation in building responsive, accessible, and high-performance user interfaces. My expertise lies in modern frontend technologies including React.js, TypeScript, Next.js, and Tailwind CSS. I have a solid understanding of UI/UX principles and frontend best practices, enabling me to craft intuitive and visually appealing user experiences. While I have experience with backend technologies like Node.js, MongoDB, and PostgreSQL, my passion lies in creating seamless and engaging interfaces. I've contributed to a variety of user-focused projects such as event ticketing platforms and ERP software. I'm excited to bring my frontend development skills to a collaborative team and help deliver impactful digital products.

SKILLS

Programming Languages Nodejs, JavaScript, TypeScript
Databases MongoDB, PostgreSQL
Web Development Frameworks Express js, Reactjs, Nextjs
Version Control and Tools Git, GitHub, VS Code

Organizer Event Zone Link Apr '25 — Apr '25

- This project is about event organizer platform. This platform show case the past and upcoming event of organizer. People can buy ticket directly from the organizer site.

WORK EXPERIENCE & PROJECTS

Frontend Engineer Jul '24
Ogaticket Enterprise Norcross, Georgia, United States
https://ogaticket.com/
As a Frontend Developer at Ogaticket, I specialize in translating Figma UI designs into fully interactive, high-performance code using Next.js and Mantine UI. In building our event ticketing web application, I focus on delivering an engaging, user-friendly interface that meets both aesthetic and functional requirements. I work closely with other software engineers to ensure seamless integration and alignment across the project, contributing to a cohesive user experience and optimized application performance.

Full Stack Web Developer
ExcellentBridge Nigeria (Remote)
https://invoicing-test.invexerp.io/
At Excellent Bridge, I work as a full stack web developer. I joined the team in customizing the existing enterprise resource platform software. While in this position, I was able to make improvements to the backend API and add some customization to the ERP software such as adding invoicing module. Improve the load time and error handling of the backend APIs.

EDUCATION

Bachelor of Science in Computer Science, Ignatius Ajuru University PortHarcourt, Rivers State. Nov '19 — Nov '23
(GPA: 4.30) Port Harcourt, Nigeria
